Week 1 BA

2024 July07 Quiz-1

Comprehension for questions 1-2 (source Q2)

Dr. Milo is exploring the attendance of employees (number of sick days taken) in an organisation. He needs to make a presentation to the company's top management. Table-1 specifies the total number of sick days taken by the employees of three different teams "Team-A", "Team-B" and "Team-C" over the past 12 months. Then answer the given sub questions Note to students: For this comprehension, please do not worry about the colour combinations/ reproductions. In TCS ion, the colour representations may not appear accurately. Kindly use the "data labels" and "visualisation theory" to arrive at the appropriate answers.

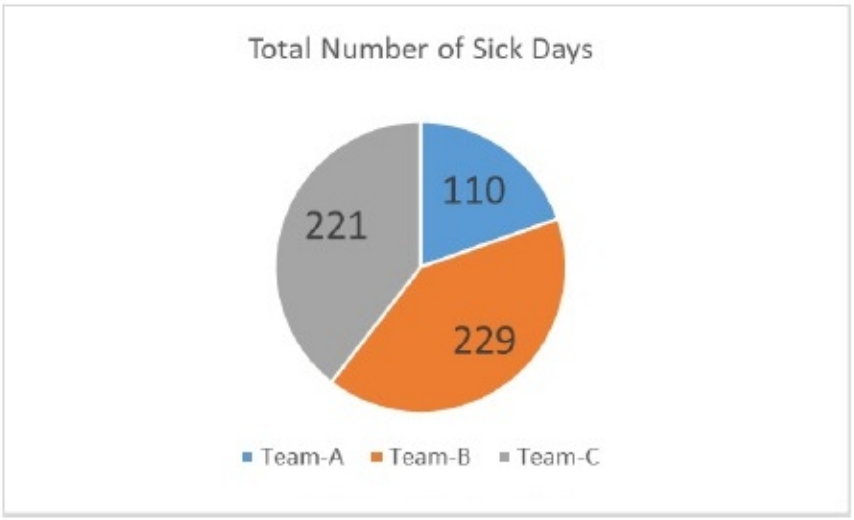

Month	Team-A	Team-B	Team-C
1	12	22	26
2	11	15	28
3	6	17	24
4	5	11	22
5	5	27	7
6	9	11	27
7	11	30	6
8	6	28	19
9	16	13	20
10	9	17	9
11	8	22	8
12	12	16	25

Table-1

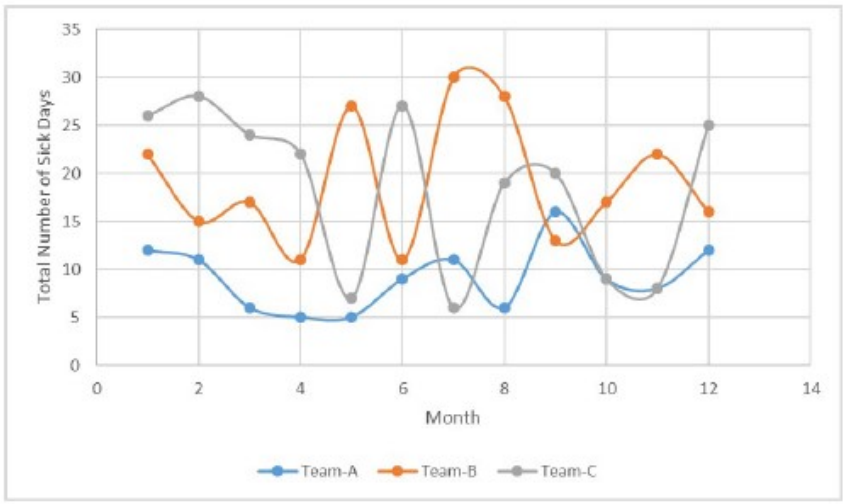

1. [Source Q3; MCQ]

If the aim is to indicate the team which has the highest number of sick days in the whole year, then which of the following visualizations would be best suited?

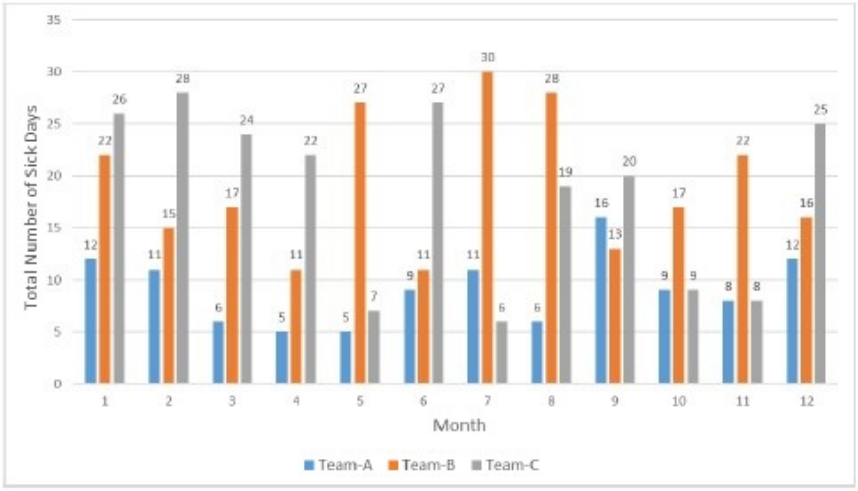

(a)

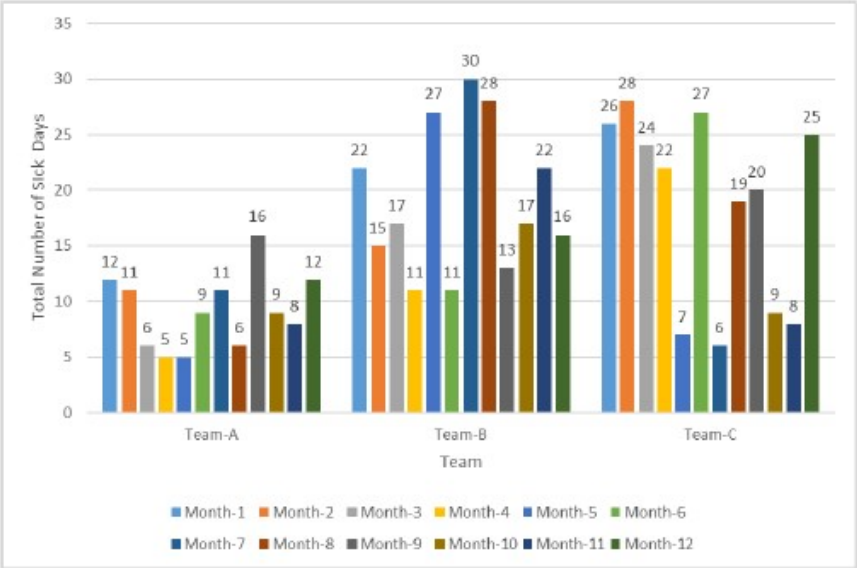

(b)

(c)

(d)

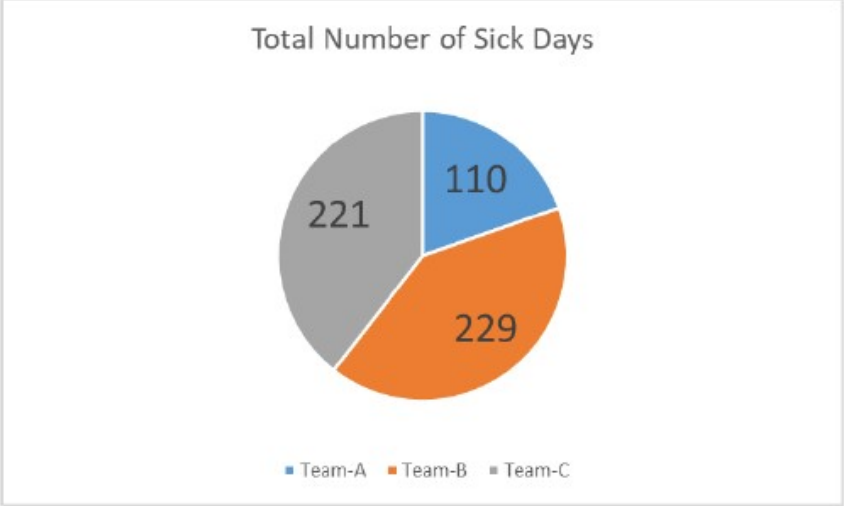

[Source ans: a]

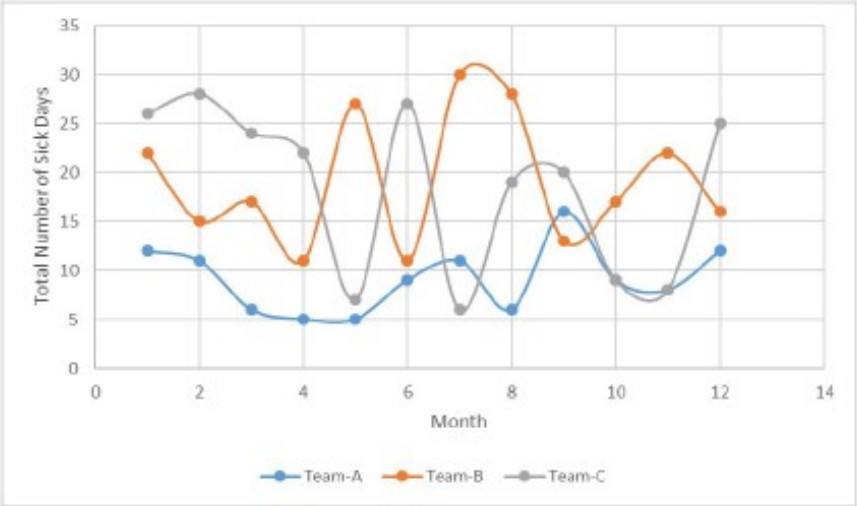

2. [Source Q4; MCQ]

If the aim is to display team wise pattern in total sick days over the months in the year, then which of the following graphs will be best suited?

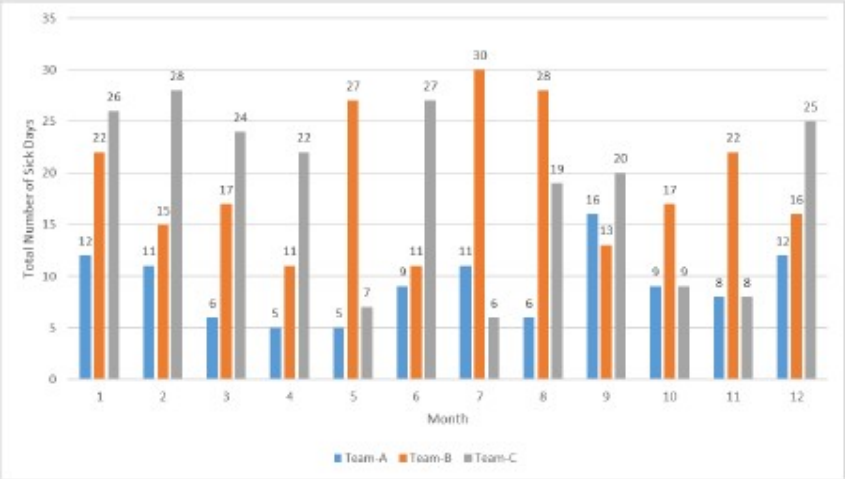

(a)

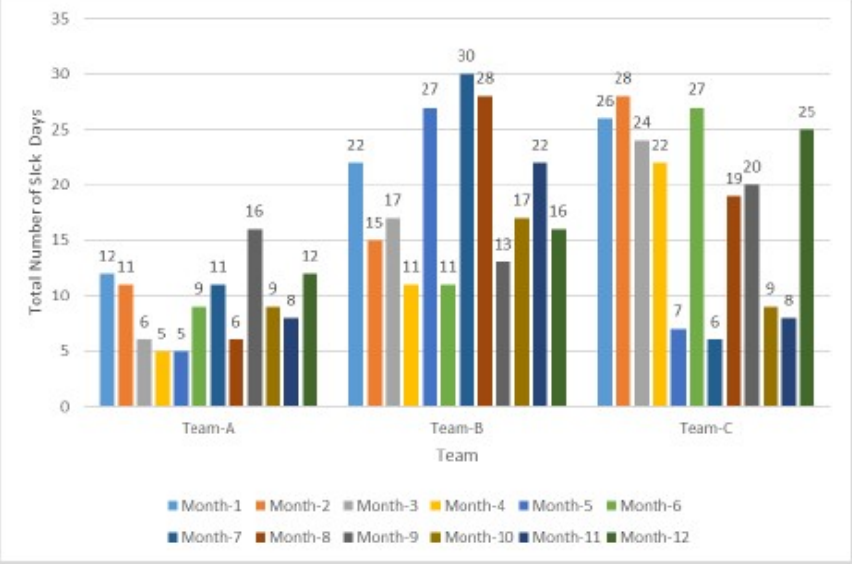

(b)

(c)

(d)

[Source ans: d]

2025 Feb23 Quiz-1

3. [Source Q3; MSQ]
When is a "Pie Chart" the best visualisation option for presenting data (choose all that is/are applicable)?

(a) When the outliers in the data need to be shown

(b) When trends in the data need to be shown

(c) When relationship between variables need to be shown

(d) None of these

[Source ans: d]

2025 Jul13 Quiz-1

4. [Source Q2; MCQ]
When is a "Pie Chart" the best visualisation option for presenting data?

(a) When the outliers in the data need to be shown

(b) When trends in the data need to be shown

(c) When proportions in the data need to be shown

(d) None of these

[Source ans: c]

5. [Source Q3; MCQ]
Given Figure-1, what is the message that can be best conveyed through the graph?

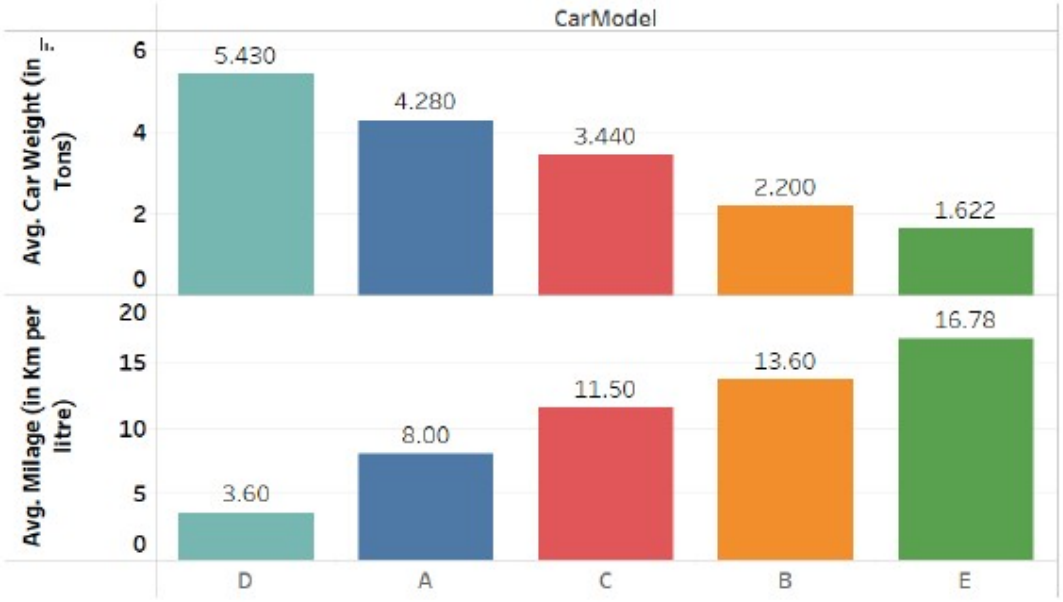

Figure-1

(a) Message: "Mileages trend for different Models"

(b) Message: "Relationship between Car Weight and Mileage"

(c) Message: "Relationship between Models and their Car Weights"

(d) Message: "Car Model wise minimum and maximum Avg. Mileage and Avg. CarWeights"

(e) Message: "Model wise relationship between Car Weight and Mileage"

(f) Message: "Car weight wise Mileage trend for different Models"

(g) Message: "Mileage wise relationship between Models and their Car Weights"

[Source ans: d]

6. [Source Q47; MCQ]

A cricket analyst is interested to compare two bowlers (X and Y) based on the number of fours conceded by them in an over. Given that both bowlers have bowled their full quota of 4 overs in a 20 over game, which of the following graphs would be the best to identify and indicate that Bowler-X has performed better than Bowler-Y (choose all that is applicable)

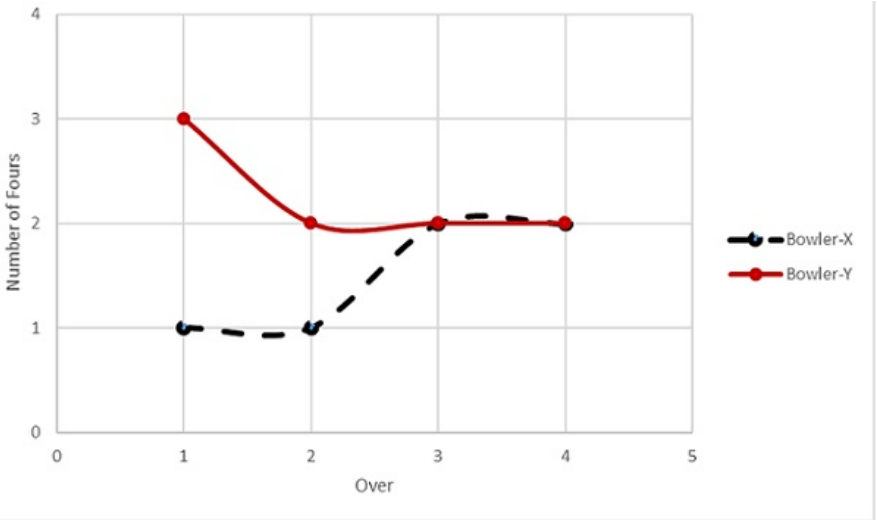

(a)

Over	Bowler-X	Bowler-Y
1	1	3
2	1	2
3	2	2
4	2	2
Total	6	9

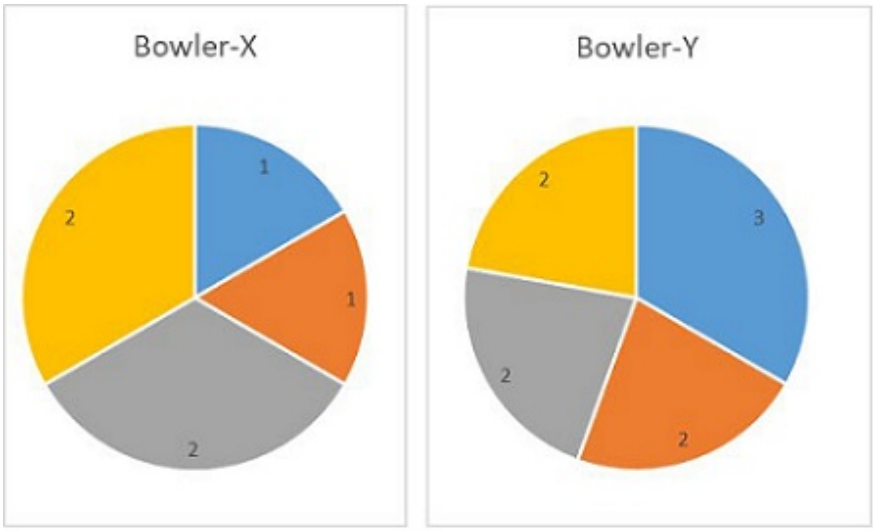

(b)

(c)

(d)

[Source ans: a]
